G-Technology, Inc. Introduces G-PLAY™ ***Your movies, music and photos wherever you go*** Click here to Download the datasheet

San Francisco, CA (MacWorld Expo), January 11, 2005, – G-Technology, Inc. (G-Tech) today introduced G-PLAY, a personal multimedia player that lets you take your movie, music and photo libraries with you wherever you go. G-PLAY holds up to 20 full quality DVD movies, over 100 DivX videos, up to 25,000 songs and over 1,000,000 VGA quality digital photos. It is simple to download content from your computer to G-PLAY and then play it on any TV. G-PLAY also doubles as an external hard drive for your data files.

"G-PLAY is the ultimate portable digital entertainment system," said Roger Mabon, President of G-Technology Inc. "With G-PLAY you can enjoy your movies, music and photos anywhere. Transfer your personal DVDs, DivX videos, MP3s and JPGs to G-PLAY via USB and then play the content on any TV. It's really that simple!"

About G-PLAY

G-PLAY makes it easy to download content from your computer and play movies, music and slide shows on any TV. Simply hook up G-PLAY using the include AV cable and sit back and enjoy the fun. G-PLAY is operated via an infrared remote and a simple graphical user interface (GUI).

G-PLAY plays many video formats including MPEG 1, MPEG 2 and MPEG 4 (DivX, etc.). G-PLAY also plays your personal DVD movies (ISO format) as if they were playing from the original DVD at full quality and with full DVD functionality (with menus, fast forward, pause, etc.). G-PLAY supports popular music formats including WAV and MP3 and also plays JPG digital photo files.

G-PLAY hooks up to any TV, monitor, VCR, cable or satellite box that supports composite, S-video, SCART RGB, YPbPr or VGA. G-PLAY supports stereo analog, SPDIF digital audio and compressed Dolby Digital 5.1 and DTS pass through.
