

ANDY HANCOCK

Tips

Always carry one more drive than you think you need. This is where a slim drive can be extremely useful. You would rather have the extra storage and not need it, than need it and not have it!.

Label your drives. When on location, workflow speed is paramount and you never want someone on the crew to be confused about what might be on a particular drive.

Upon ingest, I store to the laptop and a G-DRIVE® ev RaW SSD simultaneously. At the end of the day, that gets backed up to a third drive for extra redundancy.
